

SPECIFICATIONS

N4155716RC021CO; UTV/ATV Utility Trailer, AAFB, Guam

1. **SCOPE:** Contractor shall provide a utility trailer for UTV and ATV transport, in which the AAFB EM flight will utilize a Ford 6 PAX Government Owned Vehicle (GOV) for movement. The trailer at a minimum should meet the following specifications:

- a. **Frame:** The body/frame should be made of Aluminum due to the humidity/conditions in Guam that increase chances of rust/damage. Dimensions should be at a minimum of 16' long and 6' 5'' wide to accommodate two vehicles.
 - b. **Axle Type:** Tandem, providing more support and stability while transporting UTV or ATV's
 - c. **Safety:** Trailer should have reflective material, deflectors and turn signals via electrical connectors attached from trailer to GOV.
 - d. **Loading features:** A loading ramp should be installed as part of the trailer or available as two separate ramps within the trailer frame. Tie down hooks installed on the trailer are also necessary (4 or more) to secure UTV/ATV's to the trailer to prevent movement during transportation.
 - e. **Trailer Hitch features:** Tongue latch or equivalent that provides secure attachment to GOV hitch with locking pin. Trailer hitch wheel mount that allows for movement of the trailer without being attached to a vehicle. Safety chains that attach from trailer to the frame of the GOV being used to transport the trailer/UTV/ATV's. Also an electrical or manual trailer hitch jack kit in order to lower and raise the trailer hitch for attachment/detachment from the GOV.
 - f. **Additional Features:** Front rail and stoneguard kits are useful to prevent damage from rocks and debris that could be projected from roadways and impact UTV/ATV's. An additional spare tire mount and tire would be useful but not mandatory.
 - g. Ideal Manufacturer's warranty would be for at least 2-5 years.
2. **POINT OF CONTACT (POC):** The following individual shall serve as POC after contract award for coordination purposes:
